COMPANY OVERVIEW

For over 85 years, **Balassa Laboratories** has been a trusted name in over-the-counter pharmaceuticals, delivering effective solutions for common skin conditions. Founded in 1937 by Joseph Balassa, the company began as a small pharmacy with a singular mission: to create reliable, accessible remedies that people could count on. What started as a local endeavor quickly grew into a national name, known for its innovation, quality, and commitment to customer care. Balassa Labs' flagship products, such as **WartStick®** and **CornStick®**, have been household staples for decades, providing proven relief to millions of people. These products are recommended by healthcare professionals and parents alike for their effectiveness and ease of use. But the success of Balassa Labs is not just rooted in its longevity—it's driven by an unwavering focus on meeting the real needs of its customers.

Over the years, Balassa Labs has evolved from a small pharmacy into a bustling **OTC pharmaceutical manufacturing powerhouse**. Known for its stringent FDA-compliant production processes, Balassa Labs partners with other brands to bring their product ideas to life. With decades of experience in producing high-quality over-the-counter products, the company has become a trusted contract manufacturing partner, helping other businesses grow while maintaining the highest standards in product safety and quality.

Joseph Balassa's vision of creating solutions for everyday health challenges continues to shape the company's mission today. Under the leadership of the DiGaetano family, Balassa Labs not only honors its founding principles of integrity and innovation but also embraces cutting-edge manufacturing techniques. This allows them to produce high-quality, scalable solutions for their own products and for their contract manufacturing partners.

From its humble beginnings to its status as a **leader in both product development and contract manufacturing**, Balassa Labs remains committed to helping people live better lives. As the company moves forward, it continues to innovate, ensuring that both healthcare professionals and consumers have access to effective, reliable treatments they can trust.

WartSTICK®

40% Salicylic Acid

Applied 1x daily without bandages & still worked! ★★★★★

WOW!! My daughter had over 20 warts of varying size/depth on her feet & toes. Bought this product July 16th. It is now September 2 and ALL WARTS ARE GONE!! Applied daily for the first few weeks, then every 3/4 days. Some fell off, some were able to be picked off. Some just downright disappeared!

WARTSTICK FOR PLANTAR WARTS

**40%**
SALICYLIC ACID
**MAXIMUM
STRENGTH**

Designed for the tough skin on feet, WartStick® for Plantar Warts gives an edge to pediatricians and parents to manage these persistent issues effectively.

WartStick® for Plantar Warts provides targeted relief without the need for painful procedures.

MSRP**\$15.99**

Cheaper than a Dermatologist visit. ★★★★★

This was an outstanding product to get a plantar wart removed from our daughter's foot. I was skeptical at first, as this looks like chapstick and doesn't have much of a medicinal smell. We applied once to twice daily, and kept the plantar wart covered with a small strip of athletic tape. We didn't notice much for a few days but then it started to turn white, and then a large chunk of the wart came off with the tape after a few weeks. The remaining chunk of wart came off a few days later.

The Best! ★★★★★

This stick is the best for wart remover. I have frozen my daughter's wart a few times and it never worked. This has worked phenomenal.

Removed my son's wart in his fingers ★★★★★

I got this because my 5 year old son had a wart and I didn't want to attempt the burn off method. We used this for a few days and it didn't bother my son. He told me it doesn't hurt. After a few days, the wart fell off like a dried wound skin. The bandaids are perfect.
